## **2023 Street Maintenance Announcement**

*Announcement Date: July 7, 2023*

**What's Happening?** Construction on West Church Street during the week of July 10, 2023. See below for more information. The roadway will remain open to local traffic during construction with short delays possible.

### **Cold Mix Asphalt Paving with Surface Seal Coat**

Cold-mix asphalt paving provides a more durable surface than traditional oil-and-chip seal coat treatments.

A non-tracking emulsified asphalt oil is put down to prime the surface. Thirty minutes later it can be driven on. Then a densely graded cold-mix asphalt is applied, it will be allowed to cure for approximately one to two weeks. This surface can also be driven on, as directed by the contractor.

After the one to two week curing period, additional primer oil is applied and a

surface coat of oil and steel slag will provide for a longer lasting moisture resistant asphalt surface. Cold mix asphalt treatments have been used successfully in the Village of Savoy, the Village of Tolono, and St. Joseph as well as in other townships and municipalities.

**Where Is It Happening?** West Church Street as shown on the construction location map included, approximately 3000 ft of roadway, including the intersection of South Mattis and West Church Street.

**When Is It Happening?** Initial work is going to occur during the week of July 10th. Please visit the Village of Savoy's website and Facebook page for the latest updates on this project.

We look forward to the completion of this work. Please be patient as the work is performed and be on the look-out for construction workers. If you have any questions, please e-mail [publicworks@savoy.illinois.gov](mailto:publicworks@savoy.illinois.gov)
